Adrian Góra

AI / Software Engineer | LLM apps, RAG, agents | TypeScript, Python

adrian.gora14@gmail.com | adagora.github.io | linkedin.com/in/adrian-gora | github.com/adagora

`Available from 1 November 2026, no notice period | Poland, remote or hybrid, also open to remote roles in the EU and worldwide | B2B or employment contract`

PROFILE

AI Engineer at Wiśniowski, building internal tools for document search, translation, meeting reports and production analysis. Previous roles include software engineering in fintech and Web3, plus automotive CAD design.

EXPERIENCE

AI Engineer · Wiśniowski

`Feb 2025 – present`

Internal AI tools for a Polish manufacturer of industrial doors, gates and fences. Official title: Specjalista ds. AI.

- **Company-wide RAG assistant:** Deployed RAGFlow on a Linux server and connected it to Open WebUI as the company chat. It answers from the company's technical PDFs with complex layouts. Telemetry and monitoring are built for EU AI Act compliance.
- **Microsoft Teams meeting pipeline:** Scans one group's meetings in on-premises Outlook and switches on automatic recording. Transcripts and recordings come in through Microsoft Graph (webhooks and polling), and an LLM turns them into structured JSON reports.
- **AI translation portal:** Built an internal portal to replace lokalise.com. Gemini pre-translates every key, translators accept or fix it, and missing keys are flagged. To keep terms consistent across languages, I added statistics, translator helpers and a generated starting glossary. Every decision is logged, which shows how often the AI is right.
- **Process-route analytics:** Working on a prototype that lets engineers chat with historical production traces, test new settings and get suggested routes. A deterministic core computes the numbers, and experimental modules add an LLM and autoresearch.
- **AI interviews for process improvement:** After a 15-minute voice or text interview about someone's daily work, it writes an automation report, adds what it learned to an LLM wiki and turns repeatable tasks into SKILL.md files for agents. Runs on the Gemini managed-agents sandbox.

SELECTED PROJECTS

PDF-Insight: validated document extraction `github.com/adagora/PDF-Insight`

PDF → validated JSON with local inspection, text redaction and source checks for amounts and dates. React, Cloudflare Workers, Gemini and shared Zod schemas; 298 unit/contract/property tests.

VisualRAG `github.com/adagora/try_pixelRAG_optional_BM25_hybrid_JEV`

Pixel-level retrieval over technical PDF pages, combined with BM25 text search; answers cite source pages.

CAD quoting engine for machined parts `github.com/adagora/cad-tools (skills/wycena)`

Prices a machined part from its STEP file (3D CAD model) for a tool shop. The code calculates geometry and cost, and the AI only reviews the machining process and risks, like a shop manager would. Includes a web app for estimators and automated tests.

LLM-judged translation audit `github.com/adagora/jev-experiments`

Checks terminology across 7,040 translated texts in 8 languages. An AI model made 99,933 decisions in 3 minutes, and translators approve the results in a small review app.

EARLIER EXPERIENCE

Software Engineer · Freelance — Aug 2023 – Jan 2025

- Prototyped predictive models and document chat; shipped a web/mobile staking UI in TypeScript, React and ethers. 2nd place, LearnWeb3 AI Hackathon.

Full-Stack Engineer · Playdate App Limited — Jun 2023 – Aug 2023

- Built mobile release versioning, fixed Android onboarding and owned CI/CD on AWS Elastic Beanstalk (React Native, Django).

Software Engineer · Ariable — Dec 2022 – Jun 2023

- Delivered the front-end MVP of an NFT perpetual trading platform and a real-time Node.js + PostgreSQL watcher for on-chain transactions. Also reviewed the Solidity contracts.

Frontend Engineer · BlockchainWares Software — Dec 2020 – Dec 2022

- Built balance, contacts and sanction-screening features for a regulated financial application (React, TypeScript, React Query), a Material-UI component library in Storybook and the Cypress E2E suite.

Web Developer (part-time, in parallel) · Nervos Network — Dec 2021 – May 2022

- Contributed to a DAO voting app and built a bridge UI for onboarding to the network.

Automotive engineering · Varroc Lighting Systems, Auto Design, Alpha Technology — Jan 2017 – Jul 2020

- **Product Engineer, Varroc Lighting Systems.** Designed automotive lamp components in CATIA V5, from concept and feasibility to tooling, BOM and GD&T drawings, with Czech R&D.
- **CAD Designer, Auto Design.** Designed interior parts (instrument panel, door trim) for Audi and ported parts from CATIA V5 to NX 11.
- **Project Engineer, Alpha Technology.** Prepared technical inquiries for the VW Group, worked in the D-FMEA team and trained staff on plastics processes.

SKILLS

LLM applications	RAG (hybrid BM25 + vector, reranking, citations), Visual RAG over PDFs, Agents and tool calling, LLM-as-judge, Structured extraction, Evaluation and benchmarks, Prompt engineering
Models and platforms	Claude, Gemini, OpenAI, Vercel AI SDK, RAGFlow, Open WebUI, FAISS, Microsoft Graph
Languages	TypeScript, Python, Go (one project), Rust (6 months), JavaScript, SQL
Backend and infrastructure	Node.js, Bun, Express, NestJS, FastAPI, PostgreSQL, Prisma, Redis, Linux servers, GitHub Actions, AWS Elastic Beanstalk, Telemetry and monitoring
Frontend and testing	React, Next.js, React Native, React Query, Material-UI, Storybook, Cypress, D3, Playwright, pytest
Engineering and CAD	CATIA V5 (advanced), Siemens NX, AutoCAD, GD&T, BOM, D-FMEA, Plastics, OpenCASCADE / build123d, STEP and DXF
AI-assisted development	Claude Code, Codex, Agent skills, AGENTS.md
Web3	Solidity, Foundry, ethers.js, Cardano

EDUCATION

MSc Eng., Materials Engineering (surface engineering and heat treatment)
Silesian University of Technology, Gliwice, 2010–2016

Exchange, Forming technology (Umformtechnik)
TU Bergakademie Freiberg, Germany, 2014–2015

Exchange, Materials science
Universidad de Oviedo, Spain, 2013

LANGUAGES

Polish Native · **English** Professional working (B2) · **German** Limited working (B1, DSH-2 certificate)

CERTIFICATES

CATIA V5, advanced level, CADSOL Design Poland (2018)

AutoCAD, levels 1 and 2, Autodesk (2015)

Generative AI Essentials for Software Developers

AWARDS AND PUBLICATIONS

2nd place, LearnWeb3 AI Hackathon (2023)

Co-author: *Laser surface treatment technologies: laser ablation*

I agree to the processing of my personal data provided in this document for the purpose of the recruitment process, in accordance with Regulation (EU) 2016/679 (GDPR).
